We respectfully request to adopt Ming Ai Zheng, born on July 4, 2014 from Beijing Social Welfare Institute, as our daughter from the People’s Republic of China. We have read the medical chart of Ming Ai Zheng and thoroughly researched her medical condition: Congenital Heart Disease. We are confident that we can provide the best home and medical care for her. We live in Pleasantville, NY which is near Children’s Medical Hospital, a highly ranked pediatric medical center. Dr. Amy Good is the director of the International Adoption Center at Children’s Medical Hospital; he has reviewed Ming Ai Zheng’s medical file and has informed both prospective parents of the surgeries and therapies needed to care for Ming Ai Zheng.

At Children’s Medical Hospital, there is a specialty center for children with heart conditions. The center is designed to address the complex therapy, developmental, assistive technology and care coordination needs of children, youth and adults with heart disease and physically limiting conditions. The medical center also offers services of an Occupational Therapist. Therefore, Ming Ai Zheng will receive the best care possible for her medical condition.

There is a strong Chinese community in Pleasantville, including many Chinese speaking families. In addition to attending school, we will make every effort to educate Ming Ai Zheng in Chinese culture including her steady involvement in local Chinese heritage groups and activities. We will educate Ming Ai Zheng in Mandarin language as well as help her to learn English for continued success in school and life.

We are very supportive and loving parents to our children, Jessica, age 6, Amanda, age 4, and Erica, age 3. All of our children are very compassionate and caring individuals who are very excited to meet their new sister. My wife and I are therapists (Susan: Speech-Language Pathologist, John: Occupational Therapist) with expertise in pediatrics. Therefore, Ming Ai Zheng will have two parents that love her unconditionally and are able to provide therapy and support due to their understanding and education regarding children with special needs.
